

Renfrew County and District COVID-19 Vaccine Communications Committee

COVID-19 Vaccine Key Messages

General COVID-19 Vaccine Information

1. When will Renfrew County and District residents receive the COVID-19 vaccine?

RCDHU will be aligning the COVID-19 vaccination rollout as directed by the [Ministry of Health](#) and is working to ensure residents receive the vaccine as soon as they become eligible, and as the vaccine supply permits. Timelines will be set, and clinics scheduled based on vaccine availability. For the most up-to-date information on vaccine rollout in the coming months, stay tuned to Renfrew County and District Health Unit's (RCDHU) [COVID-19 webpage](#).

2. What vaccines are available for use in Canada?

Health Canada has approved two vaccines for use in Canada to date:

- Pfizer-BioNTech – approved on December 9, 2020 for individuals 16 years and older.
- Moderna – approved on December 23, 2020 for individuals 18 years and older.
- AstraZeneca – approved on February 26, 2021 for individuals 18 years and older. There is currently limited information from clinical trials on the efficacy of AstraZeneca COVID-19 Vaccine in individuals ≥ 65 years of age. No dose adjustment is required.
- Janssen - approved on March 05, 2021 for individuals who are 18 years of age and older.

Depending on vaccine availability, RCD residents could receive any of the approved vaccines. For further information, please see Health Canada's [COVID-19 Vaccines Webpage](#).

3. What about clients with specific health issues or conditions?

There may be clients with specific health issues that would like to receive the vaccine, including:

- Autoimmune conditions
- Pregnancy
- Breastfeeding
- Suspected hypersensitivity to the vaccine or one of its components
- Bleeding disorder that is not optimally managed

For these clients, COVID-19 vaccination requires an assessment of the risks and benefits of vaccination with the health care provider most familiar with their current medical condition (e.g., primary care physician, medical specialist, or nurse practitioner).

For more information, visit www.rcdhu.com or call or call (613) 732-3629 or 1-800-267-1097

“Optimal Health for All in Renfrew County and District”

March 10, 2021

COVID-19 Vaccine Key Messages

Clients can only be immunized if a health care provider conducts a situational assessment and deems that the benefits outweigh the risks, and informed consent is obtained, including discussion about the insufficient evidence from clinical trials. See the [COVID-19 Vaccination Recommendations for Special Populations](#) for guidance on vaccination of clients with specific health issues, including recommendations and documentation required for vaccination.

4. Is getting the COVID-19 vaccine voluntary?

Yes. COVID-19 vaccines will not be mandatory, but you are strongly encouraged to get vaccinated.

5. Will I have to receive the COVID-19 vaccine if I am healthy?

A complete vaccine series with a currently authorized COVID-19 vaccine should be offered to individuals in the authorized age group without contradictions to the vaccine. The COVID-19 pandemic has caused significant harms morbidity and mortality, as well as social and economic disruption across Canada and rest of the world. The authorized COVID-19 vaccines that are recommended for use by the [National Advisory Committee on Immunization](#) have been shown to be safe, as well as effective against symptomatic laboratory-confirmed COVID-19.

6. Why is Ontario extending the interval between first and second doses? What evidence is available to support this?

The National Advisory Committee on Immunization (NACI) has provided recommendation to extend the vaccination dose interval up to 16 weeks for the three two-dose vaccines currently approved by Health Canada while maintaining a strong and sustained level of protection from COVID-19.

Current evidence from real-world experience indicates high vaccine effectiveness against symptomatic disease, hospitalization and death from COVID-19 two months after the first dose, including among older populations.

7. Why is RCD seemingly behind other regions for vaccinating other priority populations?

RCDHU and other community partners are only able to vaccinate depending on the available vaccine supply. RCD was one of the last regions to receive COVID-19 vaccine shipments.

Renfrew County and District COVID-19 Vaccine Communications Committee

COVID-19 Vaccine Key Messages

Eligibility and Timing

8. How do you determine who can get the COVID-19 vaccine and when?

The Government of Canada is responsible for approval and procurement of COVID-19 vaccine supply. The Government of Ontario is responsible for the distribution of these vaccines across the province. The [Ethical Framework for COVID-19 vaccine distribution](#) guides how the provincial government prioritizes and distributes vaccines across Ontario. An RCHDU Prioritization Committee makes decisions about priority groups using Ontario Ministry of Health (MOH) guidance in the [three-phased vaccine distribution implementation plan](#) to determine who is eligible to receive the vaccine and when.

9. How will I know when it is my turn to receive the vaccine?

Eligible groups will be notified through various multi-media channels, including public service announcements, that they are eligible to receive the vaccine. Please note that this does not mean that individuals will receive a direct phone call or email. It will be announced at a broader level and is the responsibility of individuals to access that information and book vaccine appointments through the appropriate channels. Please stay tuned to the [RCDHU COVID-19 webpage](#).

10. I am an older adult, but I do not live in a long-term care or retirement home. When can I be vaccinated against COVID-19?

On February 14, 2021, the Province of Ontario provided updated direction on the sequencing of Phase 1 priority populations for COVID-19 vaccination. Adults aged 80 and over (who are not living in congregate homes for seniors) are now part of Phase 1 of the provincial plan. Previously, these older adults were in Phase 2.

In Phase 2, adults beginning with those 79 years old and decreasing in five-year increments over the course of the vaccine rollout, are expected to be offered vaccines, depending on their availability.

11. I am an essential worker. When can I be vaccinated against COVID-19?

Frontline essential workers, including: first responders, teachers and other education staff and food processing workers are expected to be offered vaccines in Phase 2 from March to July 2021. Specific timing will depend on availability of vaccines. The provincial task force, in addition to the RCD COVID-19 Vaccine Prioritization Committee, use the ethical framework and the best available data to identify other priority populations within this phase, based on available vaccine supply.

COVID-19 Vaccine Key Messages

12. What do people need to confirm proof of eligibility for specific priority groups?

Everyone registering for a vaccination appointment will be asked to identify how they are eligible to receive the vaccine. This can include:

- ID badge
- Letter from employer
- Government issued Status Card and non-government issued Indigenous Association Status Card
- Inuit Beneficiary Card
- Métis Card
- 60s Scoop Acceptance Letter
- Ontario Health Card or other documents to verify age

13. What do I need to bring to my appointment as an individual who is 80+ years of age?

- Please bring your list of current medications.
- Please bring assistive devices if needed (e.g., scooter, wheelchair, cane).
- Please bring reading glasses and/or hearing aid if required.
- Where necessary, one support person will be able to accompany those being vaccinated (e.g., mobility, hearing or visual support). Your support person will not be eligible to receive the vaccine unless they fall into a category for eligibility and have registered for their own appointment.
- Individuals will also be required to show their Ontario Health Card or other document to verify their age at their appointment.

14. When can the public get vaccinated against COVID-19?

Starting as early as July 2021, it is anticipated that all remaining Ontarians in the general population who wish to be vaccinated will be offered a COVID-19 vaccine. Stay tuned to the [Getting a COVID-19 vaccine in Ontario](#) webpage for updates.

15. When can I make an appointment to get the vaccine?

With confirmation that regular weekly shipments of the COVID-19 vaccine will be coming to Renfrew County and District (RCD), the list of those eligible for vaccination will now be expanded to include the next priority groups as outlined by the province.

These priority groups include: Retirement Home residents (who will be vaccinated in-home by mobile vaccination teams), Retirement Home essential caregivers, residents in

COVID-19 Vaccine Key Messages

the general population who are 80 years of age and older, and Indigenous residents (on or off reserve) who are 55 years of age and older.

Please note that the availability of vaccination appointments will be based on the number of vaccine doses that RCD receives each week. Because of this, people should anticipate that it will take a number of weeks for everyone in the new groupings to be able to book and receive their vaccinations.

16. I am a HCW (in the highest and very high priority group) that has not been vaccinated yet. Did I miss my opportunity?

No, you have not missed your opportunity. Please visit: www.rcdhu.com to register with the booking system to receive your shot. If you are unable to register online, ask a family member or friend if they can assist you. If a person is unable to register online, they can call RCDHU at 613-735-9724 or 1-800-267-1097 extension 200. Residents are asked to only leave one message with their name and phone number, and someone will return their call as soon as possible.

17. What groups are not currently eligible but will be next in line?

After those individuals aged 80 years and above and Indigenous adults aged 55 and over have been vaccinated, the next groups for vaccine eligibility will include all Indigenous adults, adults receiving chronic home care and "High Priority" health care workers, which include community care lower risk exposures (mental health, addictions, developmental services), campus health, daycare/school nursing, dietary, opticians, podiatry, audiology, naturopath, social work, and non-acute rehabilitation such as chiropractic, occupational therapy, physiotherapy, psychiatry, psychology, massage therapy, acupuncture and public health. **All eligible individuals noted above will be notified when they are able to register through various media channels.**

18. Can people who have already tested positive for COVID-19 get a COVID-19 vaccine?

Yes. Those who have previously tested positive for COVID-19 should still be vaccinated and people do not need COVID-19 testing prior to vaccination.

19. If my spouse is over 80 and I am under 80, as his primary caregiver living with him, can I get the vaccine when he does (he will need assistance to go for his shot)?

Where necessary, one support person will be able to accompany those being vaccinated (e.g., mobility, hearing or visual support). Your support person will not be

COVID-19 Vaccine Key Messages

eligible to receive the vaccine unless they fall into a category for eligibility and have registered for their own appointment.

Booking an Appointment

20. How will I be able to book an appointment to get the vaccine? What if I do not have access to the internet, email or don't know how to register online?

An online, centralized, vaccine booking system referred to as the Renfrew County and District COVID-19 Vaccine Registration System, is now live for residents to access through www.rcdhu.com. Those who are currently eligible for vaccination are encouraged to register online as this is often quicker. It is recommended to ask a family member or friend to assist if they are unable to do so themselves. If a person is unable to register online, they can call RCDHU at 613-735-9724 or 1-800-267-1097 extension 200. Residents are asked to only leave one message with their name and phone number, and someone will return their call as soon as possible.

21. Do we get to choose which vaccine we get?

No, as of current, residents will not get to choose which vaccine they get. This will be based on provincial distribution, availability to local regions and supply. Remember "the best vaccine, is the one that is available to you".

22. Can we choose where we receive the vaccine?

There will be multiple locations throughout RCD where vaccinations clinics will be offered.

Fixed immunization clinics, for Phase 2 and 3 of the provincial plan will run collaboratively with the support of our primary care, pharmacies, paramedics, hospitals and municipalities as a minimum to support the immunization and administration needs for these clinics. Our municipalities will be a key partner in providing venues to host fixed immunization style clinics, as well as support with set up, take down of clinics, and traffic flow. Clinics will be hosted across the region and planned by the Local Planning Tables. The clinics will be geographically spread out and mobile vaccination teams and temporary sites will be explored to ensure maximum uptake of vaccine. Fixed immunization style clinics will be hosted in the following five regions of RCD:

- Arnprior and area
- Renfrew and area
- Barry's Bay and area
- Pembroke and area
- Deep River and area

COVID-19 Vaccine Key Messages

23. What happens if there are no appointments left to book?

It is recommended that you still register through the online booking system, which can be accessed by visiting www.rcdhu.com. If you are unable to register online, please ask a family member or friend if they can assist you. If a person is unable to register online, they can call RCDHU at 613-735-9724 or 1-800-267-1097 extension 200. Residents are asked to only leave one message with their name and phone number, and someone will return their call as soon as possible.

24. How will I be notified when it is my turn to get the vaccine?

As supply increases in the coming months, there will be communication through various media channels about who is eligible to present where for vaccination. Please stay tuned to the [RCDHU COVID-19 webpage](#) for updates.

25. What happens if someone misses their “vaccination window – can you still get an appointment?

You have not missed your opportunity. Please visit: www.rcdhu.com to register with the online booking system to receive your vaccine. If you are unable to register online, ask a family member or friend if they can assist you. If a person is unable to register online, they can call RCDHU at 613-735-9724 or 1-800-267-1097 extension 200. Residents are asked to only leave one message with their name and phone number, and someone will return their call as soon as possible.

26. How will you get the notification of your second appointment?

You will receive notification on when you can register for your second vaccination appointment. More information will be provided as it becomes available.

27. What does Ontario extending the interval between first and second doses mean for individuals who have already been booked for their second dose? Will their appointment get pushed back and will they receive the same type of vaccine?

With some limited exceptions, Ontarians will receive their second dose 16 weeks after their first dose. Individuals who have already booked their second dose will have their appointments rescheduled.

The following groups will continue to receive their second dose of vaccine between 21 to 42 days:

- Residents of long-term care homes, retirement homes, Elder Care Lodges and

Renfrew County and District COVID-19 Vaccine Communications Committee

COVID-19 Vaccine Key Messages

Assisted Living facilities who are at the greatest risk of both exposure to COVID-19 and serious illness and death.

28. How do I get my 80+ year old parents vaccinated when they can't really leave their place of residence? Can someone come to the home to do it?

There is a local working group planning for vaccine administration to populations that may require alternative locations or support to receive their vaccines safely.

Precautions to take while waiting for a vaccination

29. What can I do now and how can I help?

It is essential that we all continue to do our part to reduce transmission of COVID-19 in the community: limit your close contacts to those within your household, practice physical distance, wear a mask, wash your hands, stay home except for essential reasons, and follow local and [Provincial guidance](#).

Until vaccines are widely available, it remains important to take steps to protect yourself, your loved ones, and our community against COVID-19. Staying informed of the local vaccine status is very important and something everyone can do to help. Also, if you can help others without computer access stay informed and possibly register to receive the vaccine, that is another way you can help now or in the near future.

30. How do I decide if vaccination is the right choice for me and my family?

Feeling worried or hesitant is normal when something is new. Vaccination is a personal choice, and one that most Canadians agree is an important part of maintaining good health and for disease prevention. Please visit one of the following links for reliable resources to make an informed decision whether the COVID-19 vaccine is the right choice for you and your family: [Immunize Canada](#), [What you need to know about the COVID-19 vaccine for Canada](#).

31. Why should I get vaccinated against COVID-19?

Vaccination is one of the most effective ways to prevent the spread and reduce the impact of infectious diseases. Safe and effective vaccines for COVID-19 are becoming available to protect us against COVID-19. While many people infected with COVID-19 experience only mild illness, others may get a severe illness or even die. There is no way to know how COVID-19 will affect you, even if you are not considered to be at increased risk of severe complications. COVID-19 vaccination helps protect you by creating an antibody response without having to experience the illness itself.

COVID-19 Vaccine Key Messages

Precautions to take after receiving a vaccination

32. Will I need to continue wearing a mask after being vaccinated?

While experts learn more about the protection that COVID-19 vaccines provide under real-life conditions, it will be important for everyone to continue practicing public health measures to help stop the spread of COVID-19 which means: covering your mouth and nose with a mask, washing hands often and never touching your eyes, nose or mouth with unwashed hands, staying at least 2 metres (6 feet) away from others and self-isolating when sick. Health care and other staff must still wear personal protective equipment (PPE) when working, even after they have been vaccinated.

33. Is it true that you can't get pregnant after receiving the vaccine?

There is currently no evidence to suggest that the COVID-19 vaccine would cause infertility or pregnancy loss. For more information on the COVID-19 vaccine in relation to planning a pregnancy, during pregnancy or while breastfeeding, please see the [Society of Obstetricians and Gynecologists of Canada position statement](#).

Communications about vaccine rollout and timelines

34. What is the RCD COVID-19 Vaccine Communications Committee?

The Renfrew County and District (RCD) COVID-19 Vaccine Communications Committee is part of the RCD COVID-19 Vaccine Distribution Governance Structure. As outlined in the [Vaccine Distribution and Administration Plan \(VDAP\)](#), the Renfrew County and District COVID-19 Vaccine Command Table is providing overall direction in the preparation, launch and operations of the COVID-19 Vaccination Campaign.

The RCD Communications Committee is comprised of representatives from local hospitals including Annprior Regional Health (ARH), Deep River and District Hospital (DRRH), Pembroke Regional Hospital, (PRH), Renfrew Victoria Hospital (RVH), and St. Francis Memorial Hospital (SFMH) in addition to the County of Renfrew, Renfrew County Virtual Triage and Assessment Centre (RC VTAC), the County of Renfrew Paramedic Service, Algonquins of Pikwakanagan First Nation, Annprior and District Family Health Team, and Renfrew County and District Health Unit (RCDHU).
