

WEEVAC 6

The only stretcher in the world designed to carry six bundled babies to safety in size-adjustable, heat retaining pockets.

- Easy to handle by two people in narrow stairwells without impeding two-way emergency foot traffic.
- With an underside pouch for storing additional blankets.
- Folds in half for convenient storage.

Pockets adjust to the size of the babies. For smaller or premature infants, the bottom straps remain closed, to secure them in the top portion of the pocket. Full term infants use the whole pocket with the lower strap being used to secure their legs.

Each pocket has a large reflector-tape arrow that gives rescuers fast, heads-up patient orientation and makes the stretcher easy to find in the dark. It has fire resistant material and a functional load capacity of 350 lbs/159 kg. The lightweight, foldable aluminum frame makes the WEEVAC 6 a strong, durable and highly reliable stretcher in any emergency situation. Once evacuated - the WEEVAC 6 fits securely on an ambulance cot.

SPECIFICATIONS	
Weight	8lbs(3.6kg)
Length:Open.....	74"(188cm)
Folded.....	37"(94cm)
Width.....	17"(43.2cm)

FABRIC	
18 oz. Mylar laminated vinyl	
Exceeds stringent requirements for The Hospital Textile Flammability Performance Requirements CGSB CAN 2-4.162-M80	
Conforms to the California State Fire Marshal Code NFPA-701	

ACCESSORIES	
Each WEEVAC 6 is delivered with:	
<ul style="list-style-type: none"> • storage bag • one training video (per order).
