DEEP RIVER POLICE DEPARTMENT

SEATBELT SAFETY FOR CHILDREN

To be safely protected in a vehicle, children must be properly secured in a child car seat, booster seat or seatbelt, depending on their height, weight and/or age. Research shows that a correctly used child car seat can reduce the likelihood of injury or death by 75 per cent.

As a driver, you are responsible for ensuring that all passengers under 16 years of age are properly buckled into a seatbelt, child car seat or booster seat. In Ontario, all drivers must use proper child car seats and booster seats when transporting young children.

Child car seats must meet Canadian Motor Vehicle Safety Standards. Buckles and straps must be fastened according to the manufacturer's instructions. Newer vehicles that come equipped with a lower universal anchorage system (UAS) for securing a child car seat do not require the use of a seatbelt. A booster seat requires a lap and shoulder belt combination.

Infants who weigh less than 9 kilograms (20 lbs.) must be buckled into a rear-facing child car seat attached to the vehicle by a seatbelt or the UAS strap. A rear-facing child car seat is always best installed in the back seat. Never put a rear-facing child car seat in a seating position that has an active airbag. If the airbag inflates, it could seriously injure the child.

Toddlers 9 to 18 kilograms (20 to 40 lbs.) must be buckled into a child car seat attached to the vehicle by a seatbelt or a UAS strap; the seat's tether strap must also be attached to the vehicle's tether anchor. Children weighing more than 9 kilograms (20 lbs.) may remain in a rear-facing child car seat if it is designed to accommodate the child's height and weight. Always follow the manufacturer's instructions when installing a child car seat in your vehicle.

SPRING SAFETY CHECKLIST

Along with spring cleaning, lets take the time to make sure our homes and family are safe from the threat of fire.

Here is a check list you should go over with your family:

⇒ **Working smoke alarms cut the risk of dying in reported home fires in half**

- Ensure smoke alarms are installed inside every bedroom, outside each sleeping area and on every level of the home, including the basement

- Test them at least once a month by pushing the test button

- Replace the batteries in all smoke alarms. Best way to remember is when you change your clocks, change your batteries.

⇒ **The leading cause of home clothes dryer fires is failure to clean them.**

- Clean the lint filter before or after each load of laundry. Remove lint that has collected around the drum.

- Keep the area around your dryer clear of things that can burn, like boxes, cleaning supplies and clothing.

⇒ **Most cooking fires in the home involve the stovetop.**

- Keep anything that can catch fire - oven mitts, wooden utensils, food packaging, towels, or curtains - away from your stovetop.

- Always stay in the kitchen when frying on the stovetop.

⇒ **Extension cord fires outnumbered fires beginning with permanent or detachable power cords by two-to-one.**

- Check electrical cords to make sure they are not running across doorways or under carpets. Extension cords are intended for temporary use.

- Have a qualified electrician add more receptacle outlets so you don't have to use extension cords.

PROVINCIAL SHUTDOWN NOTICE

Formal notice of the Deep River Community Pool and Deep River Arena closing as of April 3, 2021 in accordance with the Provincial 28-day lockdown.
