CLEAR SNOW FROM YOUR VEHICLE

Driving with snow on your car is extremely dangerous. Your view may become obstructed, and the snow can slide off your roof and cover your front and back windshield.

Loose snow and ice can cause damage and/or motor vehicle collisions, injuring other drivers or worse.

In Ontario, you could be fined under the Highway Traffic Act section 74(1)(a), \$110.00 for not being able to see clearly out of the front, rear or side windows.

You may also be fined \$160.00 under the Highway Traffic Act section 111(2) as you, the driver, are responsible to ensure any material is loaded, bound, secured, contained or covered so that no portion of the load may become dislodged or fall, leak, spill or blow from the vehicle.

Electrical safety

Electrical equipment is a leading cause of home fires in Ontario. To prevent electrical fires:

- avoid running cords under rugs which can damage the cord and cause a fire
- avoid overloading a circuit. If additional outlets or circuits are required, have them installed by a licensed electrician
- use extension cords only as a temporary connection, if permanent wiring is required, have additional outlets installed by a licensed electrician
- do not link extension cords together, use an extension cord that is long enough
- plug air conditioners and other heavy appliances directly into an outlet
- install ground fault circuit interrupters (GFCIs) in bathrooms, kitchens and garages (GFCIs shut off an electrical circuit when it becomes a shock hazard)
- check electrical cords for damage, such as fraying or nicks as a damaged cord can expose wires and result in a potential shock or fire hazard
